PROFESSIONAL SUMMARY

Generative AI Developer with 2.2 years of experience designing and developing enterprise-scale AI solutions for Google using Azure OpenAI, Gemini, LangChain, Retrieval-Augmented Generation (RAG), and multimodal AI. Experienced in Trust & Safety, RAG, conversational AI, multimodal AI, fraud detection, and production-ready AI applications using FastAPI, Streamlit, Playwright, Docker, and Google Cloud.

TECHNICAL SKILLS

Generative AI: Azure OpenAI GPT-4, Langchain, LangGraph, RAG, Conversational AI, LLMs, Gemini models, Prompt Engineering

LLM Frameworks: LangChain, Structured Output, Few-shot Prompting

AI/ML: Transformers, OCR, Computer Vision, Pandas

Vector Databases: FAISS, Pinecone

Frameworks: FastAPI, Streamlit

Automation & Data Processing: Playwright, OpenCV, FFmpeg, WebRTC

Cloud: Google Cloud Storage, Cloud Run

Containerization: Docker

Programming Languages: Python, SQL

EXPERIENCE

Wipro Technologies

May 2024 – Present

Generative AI Developer

Hyderabad, India

- Designed and developed enterprise-grade Generative AI applications for Google Trust & Safety using Azure OpenAI GPT-4 and Gemini models.
- Built production-ready Retrieval-Augmented Generation (RAG) pipelines using semantic chunking, vector embeddings, FAISS, and metadata-based retrieval.
- Developed AI-powered fraud detection solutions for landing page analysis using Playwright, Gemini 2.5 Pro, and Google Custom Search APIs.
- Implemented multimodal AI pipelines combining OCR, computer vision, and LLMs for automated Trust & Safety content moderation.
- Built conversational AI applications with scenario generation, prompt engineering, evaluation workflows, and behavioral scoring.
- Collaborated with cross-functional Google teams to deliver Responsible AI solutions for Trust & Safety workflows.

PROJECTS

AI Virtual Customer Training Platform – Google Inc. | Python, Azure OpenAI GPT-4, LangChain, FAISS Jan 2026 2025 – Present

- Developed an AI-powered virtual customer simulator for enterprise training.
- Implemented policy-based scenario generation and automated evaluation workflows.
- Built Retrieval-Augmented Generation (RAG) for contextual responses.
- Reduced training effort by approximately 70%.

Landing Page Signal Analysis Tool – Google Inc. | Python, Gemini 2.5 Pro, Streamlit, Playwright, Docker Oct 2025 – Feb 2025

- Developed an intelligent 3-signal fraud detection platform to analyze advertiser landing page using three risk signals
- Implemented website impersonation detection using Playwright, Google Custom Search API, and Gemini similarity scoring.
- Built suspicious contact analysis and website quality validation to detect fake business websites.
- Reduced manual review effort by 80% while achieving approximately 95% detection accuracy.

Trust & Safety AI Content Moderation System – Google Inc. | Python, Gemini 2.5 Pro, OCR, OpenCV Jan 2025 – Sep 2025

- Built a multimodal AI pipeline that captured reviewer screens, extracted conversations using OCR, and classified policy violations.
- Developed an automated workflow using WebRTC, FFmpeg, OpenCV, and Gemini 2.5 Pro for content moderation.
- Compared AI predictions with human reviewer labels using confusion matrix analysis.
- Improved moderation consistency by automating Trust & Safety review workflows.

EDUCATION

Bhoj Reddy Engineering College for Women

Bachelor of Engineering, Information Technology

Hyderabad, Telangana

Aug. 2018 – July 2022

CERTIFICATIONS

Microsoft Azure AI-900
